

Christopher Aravena Sepúlveda

Senior Software Engineer — Platform Engineering, Architecture & AI Systems
Providencia, Santiago, Chile — +56 9 5478 3399

christopher.aravena@gmail.com

Professional Profile

Senior Software Engineer with 10+ years of experience building scalable digital products, designing platform and frontend architectures, and leading engineering initiatives in enterprise environments. My background combines modern web engineering, distributed systems thinking, and cross-team technical leadership. In recent years, I have focused on AI-powered applications, agent orchestration, developer tooling, and platform capabilities that enable AI-native workflows. Open to remote LATAM roles and relocation to Mexico.

Professional Experience

- **Globant / LATAM Airlines** Santiago, RM
Technical Leader & Developer Dec. 2018 – Present
 - **Architecture & Platform Leadership:** Led cross-functional engineering teams delivering scalable architecture and platform initiatives for LATAM Airlines in multi-team enterprise environments.
 - **Technical Direction:** Drove architecture decisions across frontend and platform domains, balancing delivery speed, maintainability, and long-term system evolution.
 - **Engineering Excellence:** Implemented code review standards and mentorship practices that improved onboarding, reduced technical debt, and strengthened delivery quality across squads.
- **Nisum** Santiago, RM
Front-End Developer (My Trips - LATAM) Nov. 2015 – Aug. 2018
 - **Product & Platform Delivery:** Built and maintained core capabilities for LATAM Airlines' "My Trips" platform in a microservices-heavy environment, improving reliability and user experience.
 - **Frontend Architecture Evolution:** Contributed to modular frontend practices and delivery workflows through close collaboration with product, design, and engineering stakeholders.
- **Thinker Thing / Behaviour Interactive** Valparaíso / Santiago
Developer & Game/Level Designer Jan. 2011 – Mar. 2015
 - **Interactive Systems Development:** Built gameplay systems and production features for global titles across PS3, Xbox 360, and mobile platforms under tight delivery constraints.
 - **Rapid Prototyping & Collaboration:** Produced functional prototypes and design documentation, aligning engineering and creative disciplines in short, multidisciplinary cycles.

Education

- **Pontificia Universidad Católica de Chile** Santiago
Diploma in Artificial Intelligence (In Progress) Sep. 2025 – Present
- **Universidad Técnica Federico Santa María** Valparaíso
B.S. in Computer Engineering Mar. 2005 – Oct. 2012
 - **Thesis Project (AI Innovation):** Implementation of a semi-automatic knowledge management system using **Natural Language Processing (NLP)** and the Semantic Web.

Technical Skills

AI Systems: LLM application design, RAG workflows, agent orchestration, AI evaluation, tool orchestration, context engineering

Software Architecture: System design, microfrontends, scalable architectures, distributed systems thinking, API design, BFF patterns

Engineering: TypeScript, JavaScript, React, Next.js, Node.js, Python, Express

Cloud & Delivery: Docker, Google Cloud, GitHub Actions, CI/CD, observability practices, technical mentoring
