

Christopher Aravena Sepúlveda

Senior Software Engineer — Tech Lead

christopher.aravena@gmail.com

Providencia, Santiago, Chile — +56 9 5478 3399

Professional Profile

I have been developing software for over a decade, with experience in both frontend (React, Next.js, microfrontends) and backend (Node.js). In recent years, I have evolved towards technical leadership and software architecture, making design decisions in complex systems and guiding development teams. Since September 2025, I have been intentionally specializing in AI applied to software development: AI-assisted development, LLM-powered applications, ML/DL fundamentals, and AI systems architecture. It is an ongoing transition — with solid knowledge already built and a long road ahead.

Professional Experience

- Globant / LATAM Airlines** Santiago, RM
Technical Leader & Developer *Dec. 2018 – Present*
 - **Engineering Leadership:** Directed cross-functional teams in the development of critical software architectures, ensuring the scalability and operational efficiency of the largest airline in the region.
 - **Process Optimization:** Implemented code review standards and technical mentoring that reduced technical debt and accelerated the onboarding of new developers in highly complex projects.
 - **Scalable Architecture:** Designed and deployed robust solutions using agile methodologies, achieving direct alignment between business goals and continuous technical delivery.
- Nisum** Santiago, RM
Front-End Developer (My Trips - LATAM) *Nov. 2015 – Aug. 2018*
 - **Product Development:** Led the implementation of key features in the “My Trips” portal, optimizing user experience and interactions with multiple microservices.
 - **Agility & Stakeholders:** Established regular demo cycles that increased visibility of product progress for Product Owners and key stakeholders.
- Thinker Thing / Behaviour Interactive** Valparaíso / Santiago
Developer & Game/Level Designer *Jan. 2011 – Mar. 2015*
 - **Game Design:** Developed and optimized game mechanics for high-traffic platforms (PS3, Xbox 360, iOS/Android), participating in global titles such as *Pacific Rim* and *Ice Age 4*.
 - **Rapid Prototyping:** Led the creation of Game Design Documents (GDD) and functional prototypes, integrating artistic and technical aspects into short development cycles.

Education

- Pontificia Universidad Católica de Chile** Santiago
Diploma in Artificial Intelligence (In Progress) *Sep. 2025 – Present*
- Universidad Técnica Federico Santa María** Valparaíso
B.S. in Computer Engineering *Mar. 2005 – Oct. 2012*
 - **Thesis Project (AI Innovation):** Implementation of a semi-automatic knowledge management system using **Natural Language Processing (NLP)** and the Semantic Web.

Technical Skills

AI & Machine Learning: NLP, PyTorch, Hugging Face, Deep Learning, Agent Orchestration

Backend & Cloud: Node.js, Express, Python, Microservices Architecture, Scalable Systems Design

Frontend: TypeScript, JavaScript, React, HTML5, CSS3

Leadership & Operations: Technical Team Management, Agile Methodologies (Scrum/Kanban), Mentoring
